We are looking for generous community members willing to run two to four 35-minute workshops to introduce our students to careers in our community. Our “Look to the Future Day” will help kids to start thinking about possibilities as they transition to high school.

Please consider including the following in your workshop:

- Audiovisuals
- Hands on
- Stories/anecdotes
- Best day/worst day
- Preparation/training
- Skills/attributes that are helpful to succeed
- Q & A

Students will choose from career workshops, participate in a panel discussion, take a career interest inventory, and think about what it takes to be successful as a person in our community, our country, our world.

Please consider spending some time sharing a glimpse of your work-life with our students ... You never know ... You may change a young person’s life!

We look forward to hearing from you soon!

Food for Thought... “What is out there for me?”
